aimed at second and third year ethics courses offered out of medical schools health sciences departments and nursing programs doing right a practical guide to ethics for medical trainees is a practical guide to analyzing and resolving the ethical dilemmas medical practitioners face on a day to day basis drawing extensively on real life scenarios this book takes a case based approach to

provide students and practitioners with the advice and skills they need to help their patients and overcome ethical challenges in the field newly co authored by wayne rosen and fully revised and updated to include up to date coverage of such important topics as the impact of digital technology and social media medical assistance in dying legislation this fourth edition of doing right will provide readers with the most up to date guidebook to medical ethics available

traditionally the knowledge needed by physicians has consisted largely of medical science but in recent years ethical questions have been looming ever larger in everyday clinical practice doing right is a practical guide to decision making in those situations using dozens of real cases it analyzes the most common ethical problems encountered by physicians and medical trainees the many topics covered include truth-telling refusal of treatment confidentiality rationing of health care parents refusal of treatment for their children living wills the ethics of medical research and assisted suicide written simply and concisely with little philosophical or legal jargon doing right should be essential reading for medical students residents and practising physicians for those who teach bioethics it will be welcome as a practical and readable textbook

the subject of medical ethics is always current and offers an inviting theme particularly for anyone who has spent his life in medical practice but the subject of ethics is impossible to deal with unless one first asks its purposes therefore this book is divided into two parts the first comprehends theoretical considerations and the second pragmatic and empirical data on and discussions of current problems part one will be of greater interest to moral philosophers philosophers and historians of science and social scientists part two should have greater appeal to physicians medical students and medical planners nevertheless it is hoped that the latter will look into part one for the justification of the conclusions the author could reach on the material presented in part two likewise it will become obvious why it is believed the solutions of many if not most ethical dilemmas are not always discernible at a given moment in time also those who are more concerned with the theoretical material of part one might find its application to current real life problems interesting it should not be too much to hope that the entire book will appeal to many general readers the bio ethical problems presented are of frequent and growing personal concern and are discussed almost daily in the news media

this book treats the most prominent issues in medical ethics in the twentieth century such as abortion artificial insemination organ transplantation euthanasia etc as discussed by muslim religious

scholars physicians and jurists despite the semi equal spread of medical knowledge among the peoples of the world and the shared dilemmas brought about by modern medicine muslims tend to follow their own medical ethics which agree ultimately with the basic requirements of islamic religion and law

the cases and arguments

ethical issues in modern medicine are of great concern and interest to all physicians and health care providers throughout the world as well as to the public at large jewish scholars and ethicists have discussed medical ethics throughout jewish history

cross cultural perspectives in medical ethics second edition is an anthology of the latest and best readings on the medical ethics of as many of the major religious philosophical and medical traditions that are available today

this is a case based introduction designed to examine the ethical questions raised by modern medical practice

medical practitioners have always been expected to abide by certain standards of conduct and uphold certain values more or less throughout the world in this book besides discussing specific ethical issues the author ponders questions such as the right to life and the integrity of the human person ethics in medicine takes account of the principles that underlie the best decisions particularly in unusual circumstances such as a pandemic many of these are enshrined in the oaths most doctors take the hippocratic oath is perhaps the best known and has influenced numerous others over the centuries however these principles and the resulting conduct have taken different directions at various moments in history and in different parts of the globe though always primarily oriented to the protection of human health the author compares some interesting similarities and differences tracing the main social legal and religious attitudes in what has come to be known as medical ethics with all its benefits to mankind alongside basic human dignity four main values have been pivotal in medical ethics caring for sick people putting their well being at the center of concern and doing good not causing harm never making a patient take risks and never prescribing a doubtful treatment fairness treating all patients in accordance with their health needs never favoring or neglecting anyone on the basis of background occupation etc self determination the patient can be informed about treatments and when possible should approve the prescriptions the doctor must show empathy

respect for confidentiality and responsibility briefly this overview of the medical profession s ethics focuses on experience principles aims virtues and above all the basic rules which in various places through the centuries have governed the tortuous paths of mankind written by an acclaimed expert in the field this book is of value for all those working in healthcare and people interested in its ethics

using a clear hands on approach to learning front office skills medical office administration 4th edition prepares you for a successful career as an administrative medical office assistant performing procedures with simchart for the medical office scmo you ll practice day to day tasks as if you were in an actual office setting this new edition adds updated content to support use of the electronic health record new affordable care act information insurance billing coding content and scmo activities woven throughout the text covering administrative tasks from appointment scheduling to medical billing this work text helps you develop the knowledge and skills you need to think critically and respond confidently to the challenges you ll encounter on the job access to simchart for the medical office sold separately a conversational writing style makes it easier for you to read and understand the material stopping points provide you with thought provoking questions or activities to break up the narrative in manageable segments hipaa hints ensure that you comply with hipaa mandates real world examples apply important concepts to the medical office setting interactive electronic procedure checklists spell out the individual steps required to complete a full range of administrative procedures and are based on caahep competencies new simchart for the medical office scmo throughout text allows you to practice common administrative tasks with real world office management software new coverage of the affordable care act and icd 10 prepares you for what you ll encounter on the job new medical assisting mapping tables tie into caahep and abhes competencies new high quality illustrations and updated screenshots helps reinforce content

deals entirely with personal ethical matters that affect the physician in his or her everyday professional life rather than with global or societal ethical issues such as euthanasia or genetic engineering this book deals with the concept of doing right regarding generally accepted principles for individual behavior especially in relation to patient care and within the context of the everyday life of the physician first concern is doing right for and with patients in interactions in the personal patient environment family home medical environment office hospital and community resources nursing home other physician roles teaching research administration community resources nursing home are also pertinent to doing right

the bma decided to take a thorough new look at the complex interface between medical practitioners and possible abuses of human rights its major new report takes its examples from all over the world it ranges across a great variety of issues including abuse of institutionalized patients research involving humans trade in human organs doctors and asylum seekers prison doctors forensic doctors the rehabilitation of torture victims and medical involvement in armed conflicts and weapons research

human existence is marked by pain limitation disability disease suffering and death these facts of life and of death give ample grounds for characterizing much of the human condition as unfortunate a core philosophical question is whether the circumstances are in addition unfair or unjust in the sense of justifying claims on the resources time and abilities of others the temptation to use the languages of rights and of justice is und standable faced with pain disability and death it seems natural to complain that someone should do something this is unfair or it just isn t fight that people should suffer this way yet it is one thing to complain about the unfairness of another s actions and another thing to complain about the unfairness of biological or physical processes if no one is to blame for one s illness disability or death in what sense are one s unfortunate circumstances unfair or unjust how can claims against others for aid and support arise if no one has caused the unfortunate state of affairs to justify the languages of fights to health care or justice in health care requires showing why particular unfortunate circumstances are also unfair in the sense of demanding the labors of others it requires understanding as well the limits of property claims after all claims regarding justice in health care or about fights to health care limit the property fights of those whose resources will be used to provide care
